Art Unit: 3734

DETAILED ACTION

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121.
 - I. Claims 1-15, drawn to a cardiac port for insertion through a wall of a heart chamber including a housing, a valve and an inlet connects to the housing, classified in class 606, subclass 228.
 - II. Claims 30-37, 41-47,54-55 and 48-53, drawn to a method for performing mitral valve annuloplasty, classified in class 623, subclass 2.36.
 - III. Claims 38-40, drawn to a system for performing annuloplasty including staples, suture or a band of material to be stapled to a mitral valve, classified in class 623, subclass 2.38.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II-III are related as product and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus, or (2) the product as claimed can be used to practice another and materially different process. (MPEP § 806.05(h)). In this case the product as claimed can be used to practice another and materially different process, such as a cardiac port which does not include an inlet connected to a housing. The method of invention II does not recite the steps necessitating the need for attaching a suture to the valve annulus, and therefore is not limited to be performed by the cardiac port of invention I. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/609,385

Art Unit: 3734

3. Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the suture or a band of material to be stapled to a mitral valve. The subcombination has separate utility as a device which can use as a clip to stop blood flow through the chamber wall. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Page 3

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

1.77.1.0504

Art Unit: 3734

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor X. Nguyen whose telephone number is (571) 272-4699. The examiner can normally be reached on M-F (8-4.30 P.M).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Hayes can be reached on (571) 272-4697. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
